

Apple iOS iPhone or iPad (14.6)

This guide will outline how to connect to the **TAFESA-BYOD** (Bring Your Own Device) Wi-Fi network on an Apple device.

Who is it for?

Anyone with an active TAFE SA account and password can connect their personal laptop, phone, or tablet to the network. Have your account username and password ready.

Examples of a TAFE SA username:

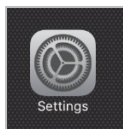

Student: john.smith@student.tafesa.edu.au or 012345678

or

Staff: jane.smith@tafesa.edu.au or SmithJ

Apple iOS iPhone or iPad (14.6)

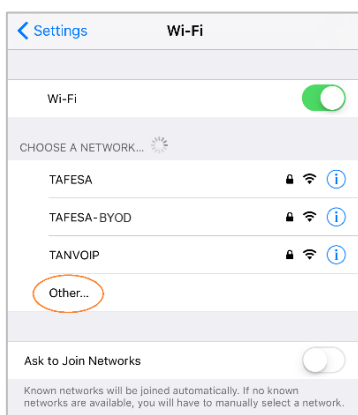

1. Ensure you are in range of TAFE SA Wi-Fi (for example, in the campus library or common student area).
2. Open **Settings**.

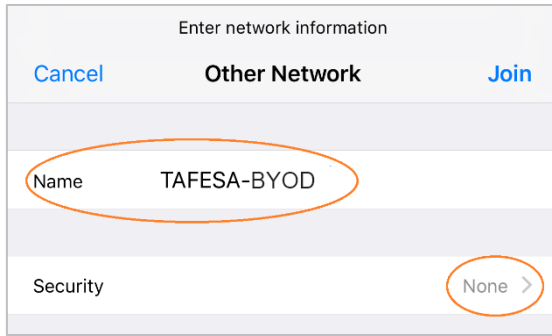

3. Select **Wi-Fi**.

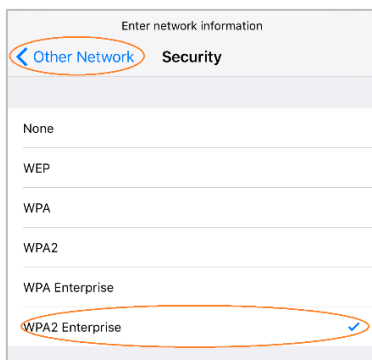

4. Select **Other** at the bottom of the list.

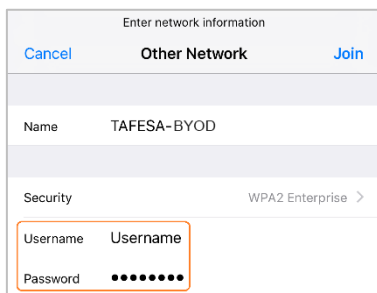

5. Type **TAFESA-BYOD** in the Name field and select **Security**.

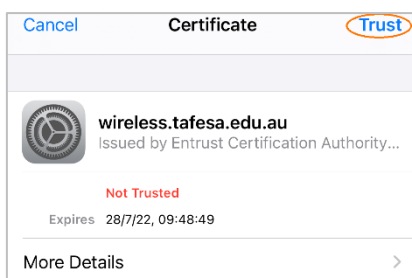

6. Select **WPA2 Enterprise** and then go back to **Other Network**.

7. Enter your TAFE SA username and password in the appropriate fields and select **Join**.

8. The device will verify your details and configure the network. When prompted on the Certificate screen, select **Trust**.

9. Your device should now be connected to the TAFESA-BYOD Wi-Fi network.
